RE: PERMANENT SOLUTION FOR THE SAN JACINTO RIVER WASTE PITS

Mr. Miller,

The EPA must make a permanent decision for fixing the San Jacinto River Waste Pits and protect the public health of all residents in East Harris County, especially those of us near the San Jacinto River and surround bodies of water.

How much longer will the EPA continue to punt its decision? The time is now! I support the ACE's conclusion that a permanent armored enclosure is the safest and most rapid remediation option to keep toxins out of the San Jacinto River.
